

HERBAL-ICE SCULPTING MASSAGE

After your face and neck have been cleansed, the next step taken in the Herbal-Ice Sculpting Massage process is for your skin to acclimate to the Margarita Aburto frozen lotion. Your Facial Consultant will first apply a small amount of product to the right side of your face and begin to softly massage it into your skin.

Then this process will be repeated on each side of your face as the Herbal-Ice Lotion application process continues...

People always ask, "Is it cold?", the best answer is, "Yes. But it is not unpleasant or uncomfortable." It is the interaction of the herbal essences in the Margarita Aburto lotion - as they are massaged into the surface of your skin at very cold temperatures - which stimulates your body to respond as it does.
