

A FEELING LIKE NONE OTHER

"I could actually feel my face lifting during the application... I am feeling almost a weight loss to my face..." – Lowell L.

Once your Facial Consultant has completed both the application of the Margarita Aburto Herbal-Ice Lotion and the massage work you require - they will begin to gently and thoroughly remove the product from your face and prepare your skin for the finishing stages.

During your Herbal-Ice Sculpting Massage the skin on your face and neck have been nourished and invigorated - both at the same time. At first these areas were cleaned and moisturized. Then they were treated to an herbal astringent lotion bath while being ice-massaged. Now, as your session comes to a conclusion, they are being gently cleansed and prepared for a cool, relaxing, hydrating towel wrap.

"Wow I loved the way her hands felt on my face! The results were amazing! My face feels softer and thinner!" – Quetzali A.
